**Subject:** Further thoughts re Nevyas/Morgan

On further reflection, I recall that Morgan phoned me, during which time I explained to him that if he continued to do what he was doing, he would be sued for libel. I think I advised him that there is a difference between reporting that he had a bad experience and making vicious or inaccurate statements about a named person. I don't recall the exact words, but he made it clear that his intention was to put the Nevyas's out of business.

is not all it's hyped up to be for patients who are not candidates. i was told numerous times before having had lasik that i was a good candidate from a supposedly reputable laser center (nevyas eye associates - bala cynwyd, pa...

I am sorry to hear about your trouble. I believe they are reputable.

Nationwide, only a tiny percentage of those operated on have significant complications.

I gather that the people deciding your legal case concluded that you were unlucky.

It looks to me like your Web site may expose you to a libel suit.
